

for us to get out of here by Thursday so I think we can take this bill probably in its order and it will get passed although I would support Senator Whitney's motion if he wants to bring it up now. We need to pass it but I think we're going to have time to pass it because we're not going to get out of here by Thursday.

PRESIDENT: Senator Snyder.

SENATOR SNYDER: Mr. President, I thought that we possibly had this thing settled with a little bit of deliberation but I, I do feel compelled to stand up here now because there are a few people who apparently are in support of the motion. What bothers me is that we are going out of order. Final reading as Cal Garsten said, should be the order of business. Now I've got a bill that's two bills ahead of 311 that to me would correct some inequities to Indians that have been on the books for 12 years. It was bracketed for yesterday, we never did get to general file. It was bracketed for a week because some other bills have been jumped ahead of it and if we--again if we open the door for--this little crack to let one bill in, that everybody's going to jump up, we're going to have the whole procedure torn down again. We've had enough trouble in this respect for the past couple of days about trying to decide what we want to do in spite of ourselves, so I think Senator Whitney knows I concur with the bill but I am bothered by the tearing down of procedure here so I'm going to have to object and hope we'll get to final reading and take our business in the order that we have established.

PRESIDENT: Senator Warner.

SENATOR WARNER: Mr. President and Members of the Legislature. I think Senator Carpenter's suggestion that to, to check for sure whether or not there is an impact upon the setting of sales and income tax rates is necessary. I had a motion on the desk which was, I assume, was to be taken up under other--other pending motions but perhaps it's pertinent now, at the appropriate time that a motion can be made but it's to the effect to clarify what I thought the intent of Senator Stull's motion and Senator Stahmer's yesterday and that was that any bill on final reading that had any future impact, not just up through June 30, 1974, but beyond, would not be considered although obviously with 25 votes as was done on one bill yesterday, it could but I think that, that all bills that may have a future impact should be held on final reading and the Legislature make an individual decision whether they want to pass any of those or not but I don't believe they should be automatically read because they can have an impact which would make it impossible for the reduction in sales or income tax as has been promised to the people and if, if, if this motion when it is disposed of, Mr. President, I would perhaps take up my motion before final reading so that those bills that would appear to have a future impact that we don't pass enabling legislation without the authorization but still have an impact upon the setting of sales and income tax rates.

PRESIDENT: Thank you Senator Warner. There, well, I guess there isn't ness--there is no need of comment from the Chair. Senator Syas, we're still debating the motion by Senator Whitney that we take up LB 311 at this time.

SENATOR SYAS: Very brief! We've already wasted about a half an hour on this, going round and round when we could have gone to final reading or done something. I've served three times on Trustee boards of churches, I've served on corporation boards, other executive boards and I never saw such an erratic---we, we're not erratic on those boards but I've never been in such
